

Hybrigenics: convening of another Shareholders' Meeting on June 25, 2015

Paris, 10 June 2015 – Hybrigenics SA (ALHYG), a bio-pharmaceutical group listed on the Alternext market of Euronext in Paris, with a focus on research and development of new treatments against proliferative diseases and specialized in protein interaction and genomic services, informs its shareholders that today's combined Shareholders' Meeting was unable to deliberate, as the required quorum was not reached. Shareholders are therefore invited to attend another combined Shareholders' Meeting, on the second call, to be held on Thursday June 25, 2015 from 3 pm at the Hybrigenics' head office, 3-5 Impasse Reille 75014 Paris – France, the agenda of which will be the same.

All of the documents pertaining to this Shareholders' Meeting are available to shareholders from the Company's head office, and can also be found on the Company's website:

About Hybrigenics

Hybrigenics (www.hybrigenics.com) is a bio-pharmaceutical group listed (ALHYG) on the Alternext market of Euronext Paris, focusing its internal R&D programs on innovative targets and therapies for the treatment of proliferative diseases and providing cutting-edge proteomic and genomic scientific services.

Hybrigenics' current development program is based on inecalcitol, a vitamin D receptor agonist active by oral administration. Oral inecalcitol has shown excellent tolerance and strong presumption of efficacy for the first-line treatment of metastatic castrate-resistant prostate cancer in combination with Taxotere®, which is the current gold-standard chemotherapeutic treatment for this indication. Inecalcitol has also been tested in chronic lymphocytic leukemia patients, an indication for which inecalcitol has received orphan drug status in Europe and the United States. A clinical Phase II study of inecalcitol is currently ongoing in chronic myeloid leukemia patients.

Hybrigenics has a research collaboration with Servier on deubiquitinating enzymes (DUBs) and their inhibitors in oncology, neurology, psychiatry, rheumatology, ophthalmology, diabetes and cardiovascular diseases. A first milestone has been achieved in a drug discovery program targeting one DUB in oncology.

Hybrigenics Services (www.hybrigenics-services.com) is the market leader in Yeast Two-Hybrid (Y2H) and related services to identify, validate and inhibit protein interactions for researchers in all areas of life sciences, using its ISO 9001-certified high-throughput Y2H screening platform.

Helixio (www.helixio.com), Hybrigenics' genomic branch, provides state-of-the-art services specialized in DNA chips, DNA or RNA target enrichment and next generation sequencing with an Illumina NextSeq500.

Hybrigenics Corp., based in Cambridge, Mass., is the American subsidiary of Hybrigenics.

HYBRIGENICS is listed on the Alternext market of Euronext Paris
