

DRONE VOLT

Deploys the DRONE VOLT ACADEMY license 1st partner center in Reims

Villepinte, June 1, 2017

DRONE VOLT, a French manufacturer of professional civilian drones, announces the deployment of its drone training school under the license DRONE VOLT ACADEMY. This school is at the heart of a strategy towards building a complete offer for professionals.

The DRONE VOLT ACADEMY center in Villepinte, Paris, has provided drone pilot training courses since 2014. The DRONE VOLT ACADEMY course allows drone pilots to be immediately operational with their tasks. From a simple ULM Certificate initiation required for piloting professional drones right up to photogrammetry, all the catalogue training modules are carried out in respect to the DRONE VOLT quality charter. The price of an initial 1 week training course starts from 2.200 € excluding taxes.

By 2016, more than 200 drone tele operators were trained, of which 95% were professionals. Candidates trained by DRONE VOLT ACADEMY have a success rate of almost 99% on Directorate General of Civil Aviation (DGAC) examination.

Olivier Gualdoni, DRONE VOLT CEO, says: "Training is an essential part of our overall offer of high value-added services around our professional civilian drones. Thanks to our comprehensive solutions, including drones for business applications, management software, training and maintenance, we are now able to attract large groups in the strategic construction and security sectors. Thanks to our licensing model, we deploy our know-how without additional investment, while enhancing our brand awareness and the visibility of our products."

Deploying in France and internationally

To satisfy the high demand for training courses, DRONE VOLT decided to create a DRONE VOLT ACADEMY network, first in France and then internationally, under licensing agreements.

To obtain the DRONE VOLT ACADEMY license and to provide the training modules, the partner candidates accept to fulfil the DRONE VOLT ACADEMY quality charter requirements. They must have a large and open indoor space (for the theoretical part) as well as a safe and authorized outdoor space for training pilots.

In the future, DRONE VOLT ACADEMY will cover all major French cities and the major countries where the Group operates, whether in Europe, Africa or North America.

A first inauguration today in Reims

Today DRONE VOLT inaugurates its network of instructors DRONE VOLT ACADEMY with its first center in Reims. Arnaud Gilotin, expert instructor and ULM and professional drone pilot, will assume starting from today drone piloting courses in the region of Reims and more widely in the Great East.

Bernard Berthier, Head of Training at DRONE VOLT, adds: "We will take great care in selecting our partners to maintain the level of excellence we already apply on our site in Villepinte. I am very pleased that this first agreement see the day with a drone expert such as Arnaud Gilotin."

Next release: The turnover for the first half of 2017, on the week of July 17, 2017
