

DRONE VOLT

Protective masks delivered in connection with the fight against the Covid-19 pandemic

Villepinte, May 5, 2020

DRONE VOLT, an embedded artificial intelligence expert and manufacturer of professional civil drones, has announced that it has ordered, received and delivered protective masks to industrial companies and local authorities in France in connection with the fight against the Covid-19 pandemic.

DRONE VOLT is putting its management's experience and network in Asia accumulated over nearly 30 years at the service of the public by ordering, transporting and delivering surgical and N95 (the equivalent of the FFP2 standard in France) masks to industrial companies and local authorities throughout France. The initial deliveries were made last week and others will follow on a regular basis each week.

In order to contribute to the fight against this worldwide pandemic, DRONE VOLT is voluntarily limiting its margin on these sales.

"I am pleased to announce that DRONE VOLT is currently able to supply substantial quantities of masks," indicated Olivier GUALDONI, chairman / CEO of Drone Volt. *"Demand from public and private players is increasing and the Group is mobilizing to meet this demand as rapidly as possible."*

Next press release: H1 2020 sales, July 22, 2020
