

DRONE VOLT

Obtains a new State-guaranteed loan (PGE) of 500,000 euros

Villepinte, 23rd of December 2020

DRONE VOLT, embedded artificial intelligence expert and professional civil drone manufacturer, announces that they received a State-guaranteed loan (PGE) from their major bank partner.

The DRONE VOLT group announces that they've acquired a State-guaranteed loan of over 500,000 euros following an identical loan received last April.

As part of the governmental incentives implemented for supporting businesses during the pandemic, DRONE VOLT has once again approached its main banking partner to obtain this loan, which offers particularly advantageous conditions.¹

Over the last months, DRONE VOLT has thus been able to consolidate its financial structure by obtaining bank loans, extending the maturity of its bond debt and strengthening its shareholders' equity.

'We significantly strengthened our cash position during the second half of the year to meet demand that could accelerate significantly in the coming months.' said Marc Courcelle, Chief Executive Officer of DRONE VOLT. *'In addition to the partnership with Aquiline Drones, which is the most emblematic event of the year, our pipeline remains strong and should enable us to win significant orders in the near future.'*
