

DRONE VOLT

New contract signed with a government agency in the Netherlands

Villepinte, July 23, 2018

DRONE VOLT, a French aeronautics manufacturer specialized in professional civilian drones, has announced the signing of a contract with a government agency in the Netherlands.

This contract calls for the supply of complete autonomous systems integrating the ALTURA ZENITH drone and the PENSAR camera equipped with artificial intelligence. The critical applications targeted relate to the strategic segment of security.

Multiplication of contracts with government agencies

Since Q2 2018, DRONE VOLT has multiplied its commercial successes with government agencies in both France and on international markets. The group has notably signed:

- a five-year six million dollar contract with one of the distributors working with a **government agency in southeast Asia** (cf. press release dated May 7, 2018)
- a multi-year renewable framework agreement with the **French army** for the supply of drones and the training of drone pilots (cf. press release dated May 14, 2018)
- a contract with the **armed forces of a Scandinavian country** (cf. press release dated June 14, 2018)

These commercial successes will contribute to growth over the coming quarters. Additionally, the group is continuing to participate in around 60 bid tenders or direct negotiations with government agencies and major clients.

Next press release: H1 2018 earnings, week of September 17, 2018
