

# **DRONE VOLT**

# Strong growth in high value-added activities: gross profit and gross profit margin up in H1 2018

Villepinte, July 16, 2018

DRONE VOLT, a French aeronautics manufacturer specialized in professional civilian drones, has announced commercial results for H1 2018 marked by:

- A sharp increase in DRONE VOLT FACTORY deliveries
- Record sales for high value-added activities
- A distribution business that contributed to gross profit
- A rise in the consolidated gross profit margin
- A commercial outlook that remains very solid

Unaudited figures in €k – IFRS standards	H1 2017	H1 2018	% change 2018/2017
Sales	3,930	3,621	-8%
o/w Distribution	3,525	2,614	-26%
o/w DRONE VOLT FACTORY, SERVICES & ACADEMY	405	1,007	+149%
Production in progress	-	-	-
Gross profit	926	964	+4%
Gross profit margin	23.6%	26.6%	+3 points

### Sharp increase in DRONE VOLT FACTORY deliveries

In H1, DRONE VOLT FACTORY produced, delivered and billed 26 HERCULES and ALTURA ZENITH drones and six PENSAR cameras equipped with artificial intelligence. Over the same period in the previous year, the group produced only 12 drones<sup>1</sup>.

This spectacular progress reflects the ramping-up of production capacities resulting from the deployment of human and technical resources.

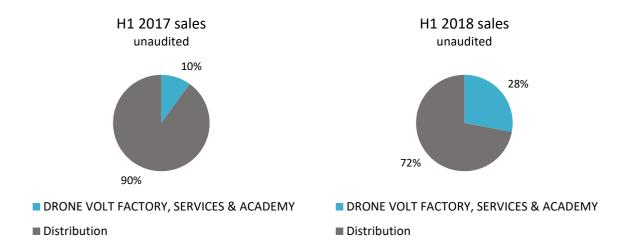

#### Record sales for high value-added activities

This excellent industrial momentum enabled the Group to meet very strong demand and report record sales from the highest value-added activities of DRONE VOLT FACTORY (production in Villepinte and Amsterdam) as well as DRONE VOLT SERVICES and DRONE VOLT ACADEMY (training).

These activities generated over one million euros in sales in H1 2018 vs. €405k in H1 2017. As such, high value-added DRONE VOLT drones and technologies now represent 28% of sales vs. 10% a year earlier.

<sup>&</sup>lt;sup>1</sup> Corrected figure compared that announced on July 17, 2017 (17 drones)

#### **Contribution of Distribution to Group gross profit**

Given the drastic reduction in marketing outlays in the Distribution segment and the transfer of demand from low value-added products to products developed by DRONE VOLT, sales in the Distribution segment fell to 2.6 million euros vs. 3.5 million euros in the same period a year earlier.

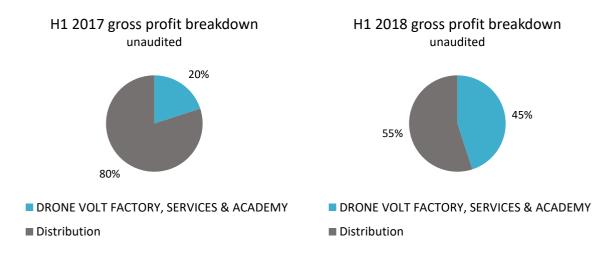

Consolidated DRONE VOLT sales consequently equaled 3.6 million euros, down 8%, with 61% recorded from international markets by the Group and its subsidiaries outside France<sup>2</sup>.

Nevertheless, this transition was perfectly managed, as the Distribution segment generated a gross profit (€530k) that contributed to covering corporate overhead costs.

## Higher consolidated gross profit and gross profit margin

In the end, consolidated Group gross profit rose in both absolute terms (+4% to €964k) and as a percentage of sales (+3 points to 26.6%).

This performance was directly linked to the increasing importance of high value-added activities, which contributed 45% of gross profit in H1 2018 vs. only 20% in H1 2017.

The acceleration in sales (which is allowing substantial economies of scale) and productivity gains linked to the constant improvement in our production facilities should contribute to future growth in gross profit and the gross profit margin.

#### A commercial outlook that remains very solid

DRONE VOLT has multiplied its marketing efforts through its participation in numerous international trade shows (including the CES in Las Vegas and Eurosatory in Paris), where its audience rose to record levels. The emergence of its solutions based on Artificial Intelligence and the development of its proprietary software has enabled the Group to attain a new dimension and attract the interest of major clients and government agencies.

\_

<sup>&</sup>lt;sup>2</sup> 41% of billing recorded by subsidiaries

These expressions of interest have already led to several major contract signings, including:

- A five-year six million dollar contract with one of the distributors working with a **government agency in southeast Asia** (cf. press release dated May 7, 2018)
- A multi-year renewable framework agreement with the French army for the supply of drones and the training of drone pilots (cf. press release dated May 14, 2018)
- A contract with the **armed forces of a Scandinavian country** (cf. press release dated June 14, 2018).

These commercial successes recorded over recent weeks and months had no impact on the H1 sales but will support growth over the coming quarters.

Finally, the Group would again note that it is participating in around 60 bid tenders or direct negotiations with government agencies and major clients. DRONE VOLT therefore remains extremely confident regarding its ability to sign major contracts within the near future.
