

DRONE VOLT

Expansion in the United States in partnership with Robotic Skies and Metatron

Villepinte, November 6, 2019

DRONE VOLT, an embedded artificial intelligence expert and manufacturer of professional civil drones, has announced a partnership agreement with the US companies ROBOTIC SKIES Inc and METATRON Unmanned Solutions in order to develop commercial opportunities in the United States.

This major partnership aims to combine DRONE VOLT's technologies with ROBOTIC SKIES' maintenance, manufacturing and regulatory expertise and METATRON's sales, training and service capabilities.

Through this agreement, DRONE VOLT is expanding its partnership already set up with METATRON in June to include a player with a network of 170 maintenance stations in over 40 countries that has just announced the arrival of BOEING as an investor.

This partnership will give DRONE VOLT broad access to the largest market in the world without any investment on its part.

"Two major drone sector players in the United States have chosen DRONE VOLT's technologies in order to develop their businesses," stated Olivier Gualdoni, chairman / CEO of DRONE VOLT. "This partnership will serve to consolidate DRONE VOLT's presence in the United States and should rapidly bear fruit."
